Colors

The Clozd color pallet is broken up into two parts—brand colors and platform colors. The brand colors are used outside the platform for client-facing materials, while the platform colors are used inside the Clozd Platform.

Brand Colors

Patina (teal) is our primary brand color and should be the first color option in most situations. Blue is a secondary color that's used for buttons and accents that need to stand out from our primary. Royal blue should be used when we need an additional color beyond our primary and secondary colors. These three colors—in this order—create our gradient. Charcoal is often used as a background color to create weight and emphasis.

Platform Colors

The platform colors are green for wins, yellow for neutral, red for losses, and violet for areas where additional colors are needed. Additionally, the blue found in the brand colors is used for buttons.

Logo

The Clozd logo is a target because it's about homing in on strength and weakness by analyzing closed-won and close-lost deals. Logos in the drive.

Make sure you leave plenty of space around around it so it stands out and doesn't get covered up.

Horizontal Logo

Our primary logo, most commonly used in alignment with text or page borders.

Vertical Logo

Use this vertical logo in open space or when it's meant to fill a vertical space and be impactful.

Icon Logo

Typically use the icon logo once the viewer has already seen the full logo. Use as a mark or accent.

Logo Usage

Do not stretch, compress, re-color, or rearrange the Clozd logo. Always make sure the logo is legible.

Fonts

Inter is a quality, all-purpose font and fits our brand feel. It's simple while not being sterile; legible at all sizes; works well for digital as well as print; and has the options needed to be flexible for any situation. This makes it a great font for our entire brand—from the Clozd Platform to marketing materials. Font in the drive.

Tone of Voice

Clozd's voice is AUTHENTIC.

Clozd is made up of awesome people, and our voice should be an extension of who we are individually and collectively. An authentic voice is:

Confident	Concise
Solution-focused	Personable
Conversational	Energetic
Knowledgeable	Bold
Direct	Trustworthy

Our messaging should speak directly to the challenges that businesses face with customer acquisition and retention, and being authentic in our communications aligns strongly with our company values.

If there's a specific persona we should strive to embody in our communications, it would be that of a knowledgeable friend. Ideally, clients would trust our industry expertise and value the way we connect with them on a personal level.

Follow these tips to write with a more authentic tone:

Know your audience: Understanding your target audience will help you choose the right tone and language that will resonate with them. (Like I said: personas!)

Be clear and concise: Avoid using jargon or overly technical language that can be difficult to understand. Keep your message simple and to the point.

Show personality: Allow your natural voice and style to shine through in your writing. This can help to make your message more relatable and engaging.

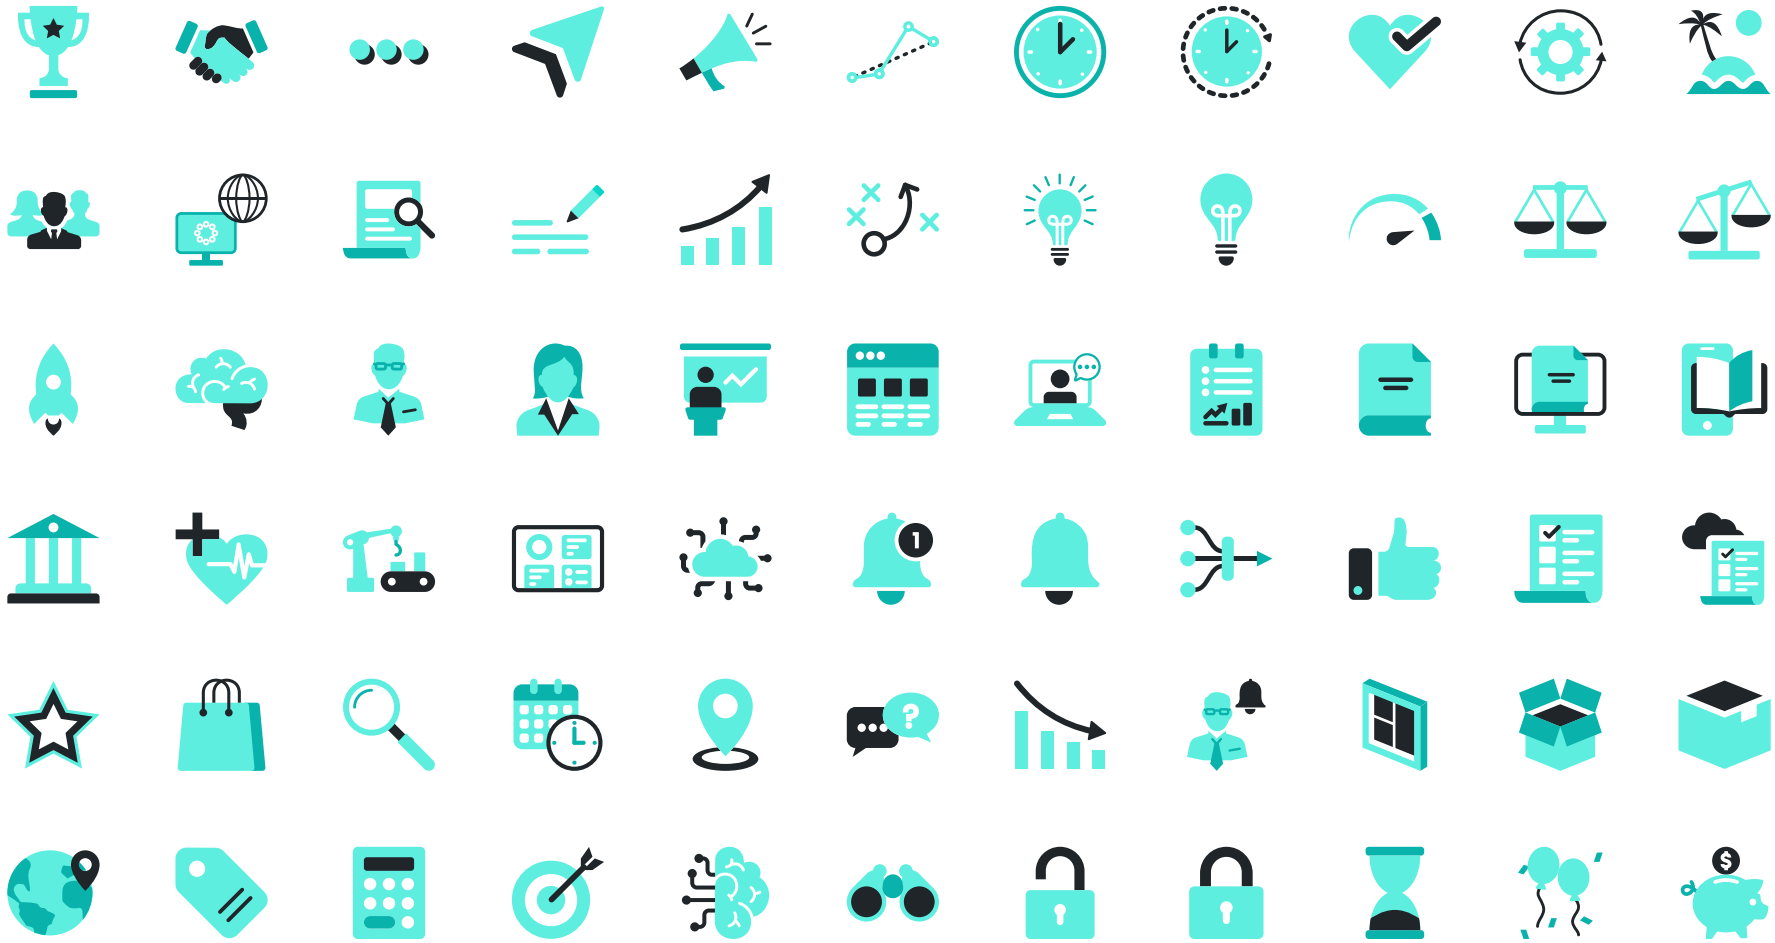
Be genuine: Avoid being overly promotional or using language that sounds insincere. Instead, be honest and transparent in your writing.

Use active voice: Writing in the active voice makes your writing more engaging and conversational.

Read and revise: Always take the time to read through your writing and make revisions until you're happy with the tone.

Icons

Do not stretch, compress or recolor the icons. The icons should be small on the page, approximately the size they are here. [Icons in the drive.]



Graphics

We commonly use our logo's shapes broken out into their own pieces. They're typically used on the edges of pages to not detract from the subject matter. While placing these shapes be creative but be mindful of where the shapes point which leads the eye. We use many other similar graphics which should have the same feel to these without detracting. Ask for details. graphics in the drive.

Textures

Talk about what are the formating needs and other stuff. Add button or hyper link to the textures in the drive.
